We are pleased to be able to offer you west coast grown M.D.R. AGING SCARCE
ENGLISH HOLLY in specimen sizes. This particular glossy waxy leaved
holly is often referred to as Oregon Holly and it is the same Holly that one
would buy in floral shops during the holidays at \$1.50 or more per plant.

The plants that we are offering will be shipped via prepaid railroad and direct
direct to you or to the nearest railroad express office. We have obtained
holly from this particular source for the last 5 years and we have found
that they produce the highest quality, most winter hardy English Holly that
we have ever seen.

We guarantee safe arrival of quality plants and provide complete planting in-
structions. You can now afford to plant these hollies yourself and save at
least half their value by this "Do It Yourself Method".

The plants shipped will vary in age from about 8 to 20 years. They will only
be dug when planting conditions are ideal and for this reason no orders will
be accepted after March 10.

Please use regular order form enclosed. Be sure to specify size, green
green or variegated.
